INSTRUCTIONS

GENERAL: Send an original copy of the application, exhibits and \$250.00 fee to U.S. Dept. of Agriculture, Agricultural Marketing Service, Grain Division, 6525 Belcrest Road, Hyattsville, Maryland 20782. (See Section 180.175 of the regulations and rules of practice.) Retain one copy for your files. All items on the face of the form are self-explanatory unless noted below.

ITEM

- 5 Insert the date the applicant determined that he had a new variety based on the definition in Section 41 (a) of the Act and decision is made to increase the seed.
- 13a First, give the genealogy, including public and commercial varieties, lines, or clones used, and the breeding method. Second, give the details of subsequent stages of selection and multiplication. Third, indicate the type and frequency of variants during reproduction and multiplication and state how these variants may be identified. Fourth, provide evidence on stability.
- 13b First, give any special characteristics of the seed and of the plant as it passes through the seedling stage, flowering stage and the fruiting stage. Second, describe the mature plant and compare it with a similar commercial variety grown under the same conditions, and indicate the differences.
- 13c A supplemental form will be furnished by the PVPO to describe in detail a variety for each kind of seed.
- 13d Provide complete data indicative of novelty. Seed and plant specimens or photographs of seed and plant comparisons clearly indicating novelty may be submitted. Seeds submitted may be sterile.
- 13e Indicate whether applicant is the actual breeder, the employer of the breeder, the owner through purchase or inheritance, etc.

13A. Exhibit A

- (1) A mutant plant found in Nasturtium Globe Orange, being spurless (no nectary).
- (2) Intercrossed with all existing colors in Nasturtium, using varieties Gem, Gleam, and Globe. Grew segregating populations and selected for the spurless factor in a complete range of colors.
- (3) Unless exposed to chance crossing with the spurred varieties, there is no essential variation in the various color lines, except possible a slight variation in earliness of the various colors.

13B. Exhibit B

- (1) No difference until flowering stage when flowers have no nectary. Having no nectary the flower is located upright on the flowering stem and which contributed to the flowers being carried above the foliage.
- (2) Is in all respects like an early Globe or Gem variety except for the spurlessness which causes blooms to face upward rather than downward.

13D. Exhibit D

'Whirlybird Scarlet' most closely resembles 'Scarlet Globe' but differs by bearing upward facing, spurless flowers.

13E. Exhibit E

Developed by the Plant Breeding staff of the Waller Flowerseed Company (owner).
